PROFILE SUMMARY

Results-driven **Python Full-Stack Developer** with 1+ years of experience building scalable web applications using **Django, Flask, and FastAPI**. Expert in developing high-performance RESTful APIs and integrating AI/Communication services (OpenAI, WhatsApp). Proven ability to **optimize system efficiency by 40%** through database tuning and asynchronous processing. Proficient in **AWS, Docker, and PostgreSQL** with a focus on security and seamless cloud deployment.

WORK EXPERIENCE

Full-Stack Developer Jan 2025 – Jan 2026

Medico Apps Bengaluru, India

- Developed scalable web applications using **Django REST Framework**, improving API response times by **25%** through optimized queries.
- Strengthened backend security by implementing **JWT authentication** and end-to-end data encryption protocols.
- Configured **AWS S3 and EC2** environments, reducing hosting costs by **15%** while ensuring 99.9% application uptime.
- Streamlined development workflows using **Git**, reducing code conflict resolution time by **20%** within cross-functional teams.

Backend Developer Apr 2024 – Dec 2024

Aventus Informatics Thrissur, India

- Launched dynamic Content Management Systems (CMS), increasing client platform visibility and user engagement by **30%**.
- Optimized legacy codebases and database schemas, resulting in a **20% increase** in overall system reliability across devices.
- Collaborated with stakeholders to translate business requirements into technical specifications for mission-critical software solutions.

PROJECTS

Casperr — B2B SaaS Platform *Django, WebSockets, Redis, Celery*

- Engineered a multi-role B2B portal featuring **real-time messaging** and live notifications via **Django Channels** and **Redis**.
- Automated 500+ daily background tasks and email triggers using **Celery** and **Django Signals**, reducing main-thread latency by **30%**.
- Developed a QR-based loyalty system allowing businesses to track repeat visits and manage rewards through a secure **JWT-authenticated** API.

Earthood — ESG & Carbon Verification *DRF, PostgreSQL, AWS*

- Built a carbon offset verification system aligned with global ESG standards, handling high-integrity data records.
- Optimized PostgreSQL indexing to handle complex inquiry listing queries **40% faster**.

Gem Advertising — CMS & Media *React, Django, FFmpeg*

- Integrated **FFmpeg** for server-side video processing, reducing manual media management time by **50%**.
- Developed a responsive frontend with **Framer Motion**, improving user retention metrics.

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, HTML5, CSS3
Backend	Django, Django REST Framework (DRF), Redis, Celery, ORM
Frontend & Design	React, AJAX, Bootstrap, Figma (UI/UX)
Databases	PostgreSQL, MongoDB, MySQL, Firebase, ElasticSearch
DevOps & Cloud	AWS (EC2, S3), Docker, Nginx, DigitalOcean, Vercel, Git
Specializations	OpenAI API, WhatsApp API, Webhooks, Google Auth, FFmpeg

EDUCATION

B.Sc. Computer Science 2024

MIC Arts and Science College Bengaluru, India
